

# ABSTRACT

A process for preparing a compound (C) represented by the following formula:

- 5 wherein R<sup>1</sup> represents hydrogen, C<sub>1-6</sub> alkyl or C<sub>3-8</sub> cycloalkyl, and R<sup>2</sup> represents hydrogen or methoxy, characterized by reacting a compound (A-1) represented by the following formula:

- 10 wherein R<sup>1</sup> has the same definition as above, with a compound (B) represented by the following formula:

- 15 wherein R<sup>2</sup> has the same definition as above, and L represents a leaving group, is provided. Compound (C) is effective for prevention or treatment of various diseases associated with angiogenesis neoplasia.
